

# 1961

*Over fifty years ago it was the invention of the rotary die cutter.*

# 1978

*Thirty-six years ago it was the helically wound, low inertia cut-off knife.*

# 2013

*Now it's the LBX stacker making the problem of scrap disappear.*

## The game has changed. Again.

With its unique combination of Geo. Martin exclusives, our LBX Stacker with Scrubber technology is re-defining run speeds and delivering the cleanest output in the history of rotary die cutting.

## Virtually Scrap-Free Loads — the new reality.

Learn more about the LBX Stacker at Booth 315 during Corrugated Week in Long Beach.
