

If you like taking risks  
this probably  
isn't the  
machine  
for you.

Martin's HBL NT makes it safe to go high board line.

The high-graphics / quick-turnaround business is full of risks. Choosing which high board line machine will be the most capable and reliable shouldn't be one of them. The Martin HBL NT is based on technology which has been field proven on 62 NT machines. Add to that 34 years of Bobst expertise in fixed architecture, high board line machines and then consider our reputation for rock solid support.

If you're ready for the quality and productivity of high board line printing be sure to consider Martin. You'll see that the HBL NT is not just the safe choice, it's also the smartest choice.
