

Introducing the

SBX Scrubber Stacker

by Geo. Martin

In 2012 the LBX Scrubber® Stacker changed the industry's expectations of rotary die cutting performance, product quality and fast, repeatable set ups.

Today...

The SBX Scrubber offers an alternative for those who need the benefits of *Scrubber Technology* without high-end sophistication. SBX combines simplicity with

performance, enhanced scrap removal and multi-out capabilities to provide a cost effective stacking and bundling solution. SBX Scrubber Layboy is also available for retrofit to existing Geo. Martin stackers.

LBX Scrubber... SBX Scrubber...

Now there's a choice that's best for you.
